

Questions About Your Appointment?

Thank you for choosing Advanced Body Scan to assist you in this life saving opportunity. Please read over this pamphlet before your appointment to better understand what to expect during your visit.

The Advanced Body Scan Difference

The majority of CT scanners are very high radiation dose devices, forcing patients to weigh the benefits of early detection versus their risk of excessive radiation exposure.

The CT used at Advanced Body Scan is low dose and the latest generation CT scanner. Additionally, most scans are completed within ten minutes and no prep is necessary.

What Are The Benefits Of A Heart Scan?

Cardiovascular disease is the leading cause of death in America, contributing to one out of every three U.S. deaths. For many, the first sign of their heart attack, was the heart attack. When detected early this disease can be prevented, treated, and even cured.

A heart scan can help show whether you have calcium buildup in your arteries. Over time, pieces of calcium can build up in the heart (calcification) and when present are often an indicator of coronary artery disease, one of the most common causes of a heart attack.

What Can A Lung Scan Detect?

Lung Cancer is the leading form of terminal cancer claiming close to 200,000 lives each year in the U.S. When detected early this disease can be treated, however, due to its minimal symptoms, it is often not detected until it reaches later stages. 85% of Americans currently diagnosed with Lung Cancer will not survive beyond five years.

The American Cancer Society as well as the American Lung Association now refer to CT scans as the “standard of care” in the early detection of cancer. It is predicted that thousands of American lives could be saved annually through early preventive screenings.

Do You Need Follow Up?

With every preventive screening from Advanced Body Scan, you will receive a comprehensive radiology report. This report is prepared by our board certified radiologist to pinpoint any areas of concern and can be interpreted by the doctor of your choice.

Should you require further information about your test results, Advanced Body Scan’s Medical Director is available for consultation.

For more information on the benefits of preventive health CT screenings, please visit our website **AdvancedBodyScan.com** or call **833.411.7226**

Additional Scans Available

In addition to heart and lung screenings, Advanced Body Scan offers a variety of preventive screenings that are non-invasive, fast, and simple to take.

Body Scan

A Body Scan enables you to find and track very small abnormalities throughout the majority of your body including cardiovascular disease, stroke, and cancer.

This screening captures detailed images from your shoulders to your thighs including your:

*LUNGS
LIVER
SPLEEN
GALLBLADDER*

*PANCREAS
KIDNEYS
PROSTATE GLAND
& MORE*

There are over 100 different types of cancers that can occur throughout your body. Many are preventable, treatable, and even curable when detected early.

Virtual Colonoscopy

While colorectal cancer is 90% preventable, it remains one of the leading causes of cancer deaths in America. As opposed to using an optical scope, your interpreting physician can view the colon in a virtual simulation. Your doctor has the added flexibility to stop and zoom in on specific areas of concern, take detailed measurements, and much more.

Better yet this is also a fast (generally under 15 minutes), minimally invasive test with minimal prep. No anesthesia is required and you can drive yourself to and from your appointment.

A Reminder...

Thank you for participating in this very special health promotion. Not only are you saving over 90% on the cost of this preventive screening, but, most importantly, the information provided is often Life Giving.

Included in this promotion is a special pre-scan 60 minute private consultation. This includes a review of your family history, personal lifestyle, and other preventive health services offered by Advanced Body Scan. Please allow yourself 90 minutes for this appointment for your consultation and screening. Bring in any questions that you feel would assist in protecting your family's future health.

This is a very limited opportunity; therefore the following **minimal qualifications apply**:

Married couples (significant others) must attend together regardless of who will be receiving the actual scan(s). We are providing this exceptional opportunity as a way to introduce our preventive services to your family should these services be beneficial to you in the future.

This special offer is limited to people 30 years of age or older. We know that everyone could benefit from this important health care information; however, we are limited to how many scans we can provide at this special offer. Statistically, people in this age group are at the highest risk of undetected heart disease or cancer.

Sorry, we are unable to accommodate children during your appointment.

This is a limited time offer. One promotion per person/couple and this is only available to new patients. Therefore, please let us know if for any reason you are unable to attend your appointment so that we can extend your opportunity to someone else.

Should you have any questions prior to your appointment we welcome your call at 833.411.7226 or you can visit AdvancedBodyScan.com for more information.
